

## Graduate requirements for M.S. degree in molecular biology, Department of Biomedical Sciences, National Chung Cheng University

1. At least twenty four credits of courses (credits of M.S. thesis not included) are required for graduation.
2. Required courses include advanced molecular biology (3 credits), advanced biochemistry (3 credits), advanced cell biology (3 credits), and seminars in molecular biology (4 credits).
3. Credit remitting and courses:
  - (1) If courses with identical titles to the required courses listed above are taken before admission, the courses and the credits can be remitted through formal confirmation by the department.
  - (2) At least six credits of courses must be taken in the first semester of admission.
4. Thesis advisor
  - (1) Students are to select a thesis advisor among the faculty within three months of admission. The form of "Agreement of thesis advising" signed by the department chair is to be submitted to the department office .
  - (2) To select a new thesis advisor, it is required for the student's advisor to submit the form of "Declaration of terminating thesis advising" that is signed by the department chair to the department office beforehand. Another form of "Agreement of thesis advising" is to be submitted to the department office once the new advisor has been selected.
  - (3) The courses to be taken by the students must be concurred by their thesis advisors.
5. Thesis progress report:

Progress report is held in the second year after admission (the Fall semester: the first Friday after class beginning, the Spring semester: the seminar course). Thesis advisors can elect to form a thesis advisory committee to supervise the progress of thesis.
6. According to the "Main points of implementation of academic ethics education for the graduate students of National Chung Cheng University," it is mandatory for the first year graduate students to take classes from the Academic Research Ethics Education Online Program at National Chung Cheng University before the end of the first semester. Only the students who pass all the classes will be issued a certificate, and the students need to present the certificate when they apply for their master's degree examination.
7. The graduate student's dissertation must be relevant to the field of Biomedical Sciences. Before applying for the degree examination, the graduate student must have his (or her) dissertation verified to fit the criteria and submit a signed checklist for the professional field of the dissertation.
8. The M.S. thesis examination is to be completed within the time period set forth by the university (consulting the university calendar). The examination, however, can not be held later than the end of July.
9. This regulation is implemented after passing the department committee and applied to the newly-enrolled students in the calendar year. A similar implementation is also applied to the changes made to this regulation.
